Summary

A motivated and ambitious professional eager to start a career in IT as a Junior QA Engineer. I have a strong theoretical foundation in software testing and a keen desire to apply it in practical settings. I am proficient in test design techniques and have hands-on experience creating test documentation. I am skilled in working with APIs (Fiddler, Postman) and databases (MySQL, MongoDB). I have programming knowledge in Python and a basic understanding of QA automation. I have experience administering remote servers based on Windows and Linux and working with VMware Workstation virtual machines. I have held leadership positions, developing and implementing CRM systems based on Google Sheets, creating new business directions, and training specialists.

I am accustomed to starting new careers from the ground up and seeing them through to completion. I am not one to shy away from challenges. My goal is to become a programmer.

I value honesty, intelligence, and responsibility in myself and others. I am eager to continue growing in a dynamic IT environment.

Technical Skills

Tools and Technologies

- Confluence, Jira, TestRail
- REST API, Postman, Fiddler
- Chrome DevTools
- HTML & CSS
- XML, JSON
- Google Docs
- Selenium IDE
- MySQL Workbench
- MongoDB Compass
- Visual Studio Code
- Git, GitHub, GitLab
- Python

Test Documentation

- Test Plan
- Test Suites
- Test Cases
- Checklists
- Bug Reports
- Test Reports

Operating systems

- Microsoft Windows
- Android OS
- Linux

Work Experience

While I do not have a traditional IT work history, I have gained a diverse range of skills through various roles in the following industries:

Online Gaming (4 years):

- Managed and maintained international gaming accounts.
- Conducted testing for promotions, payment systems, websites, and mobile apps.
- Developed and implemented CRM systems using Google Sheets.
- Led team expansion and market penetration efforts.

Skills: Windows Server, VMware, Team Viewer, Google Sheets, CRM development, testing, team leadership.

Blockchain and Mining (6 years):

- Built, configured, administrated, and maintained mining rigs.
- Managed cryptocurrency wallets and investments.

Skills: Linux, Blockchain, Cryptocurrencies, Hardware Engineering.

Engineering (8 years):

- Designed, installed, and maintained electrical systems for residential and commercial properties.
- Designed and installed solar energy systems.
- Integrated smart home systems.

Skills: Engineering, Smart Home systems, Business planning.

Construction (10 years):

- Conducted market research and developed project concepts.
- Managed construction projects from design to completion.
- Developed and managed project budgets.
- Implemented new business initiatives and expanded into new markets.

Skills: ArchiCAD, AutoCAD, Microsoft Office, Project management, Business development.

Education

Software Testing Course (*certified*), 2024:

- Software Testing Theory (ISTQB Standard)
- Project and Bug Tracking Systems: Jira, Trello, Confluence, Bugzilla
- Interfaces: HTML, CSS, REST API, XML, JSON
- Tools: Postman, Fiddler, Chrome DevTools
- Databases: SQL (MySQL), NoSQL (MongoDB)
- Automation: Selenium IDE

Python Programming Course (*certified*), 2023-2024:

- Python Syntax
- Algorithms and Data Structures
- Object-Oriented Programming
- Standard Python Library
- IDEs (PyCharm, Visual Studio Code)
- Version Control: Git

Kyiv National University of Construction and Architecture, 2005: Master's degree, Project Management.

Soft Skills

- Strong analytical skills
- Detail-oriented
- Quick learner
- Initiative
- Teamwork
- Self-organized
- Stress resistance
- Highly responsible

Additional information

- Readiness to continue learning and self-improvement.
- Belief in the ability of digital technologies to change life for the better.
- Willingness to work for results in a team of professionals and like-minded people.

Languages

- English - Upper-Intermediate
- German - Pre-Intermediate
